3. Any liquid spilled onto the top should be cleaned up immediately with a damp cloth.

Parts List

Instructions for water and electricity installation drawings

size: 1100*580*750mm

Step 2

Installation instructions:

1. Water source: hot and cold galvanized pipes are connected to the floor faucet through one underground prefabricated groove. The floor faucet is about 50MM away from the cylinder edge and 300mm above the ground. Cut-off valves are installed outside the wall.
 2. Drainage: The position of the drain outlet in the drawing is for reference only, and the central independence depends on the actual situation, and the distance should be. No more than 200mm away from the bathtub drain and connected with a hose.
