

Tub Installation

Tools You Will Need:

Adjustable wrench

Hexagon wrench

Philips Screwdriver

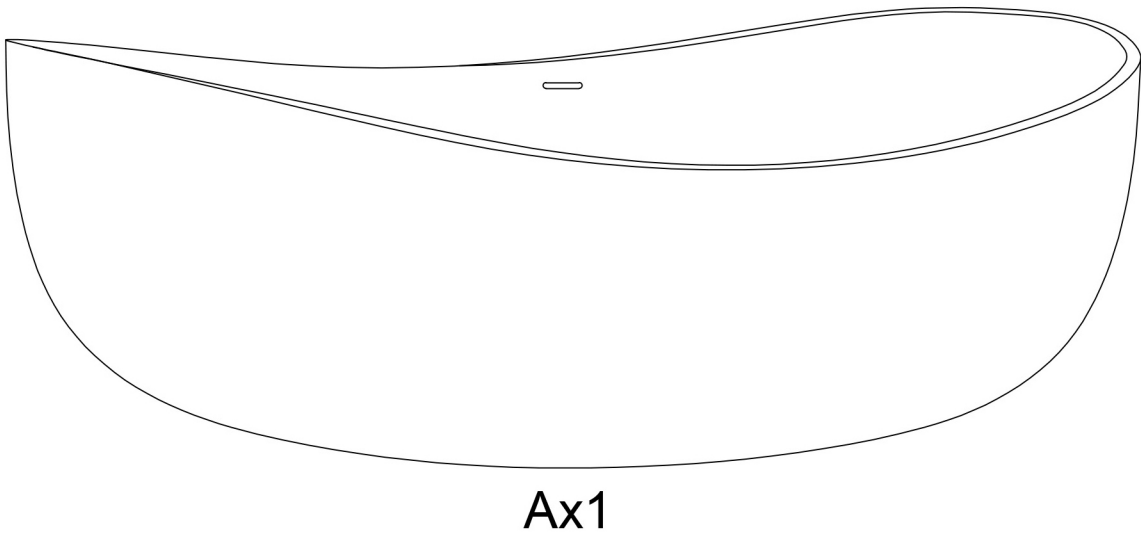

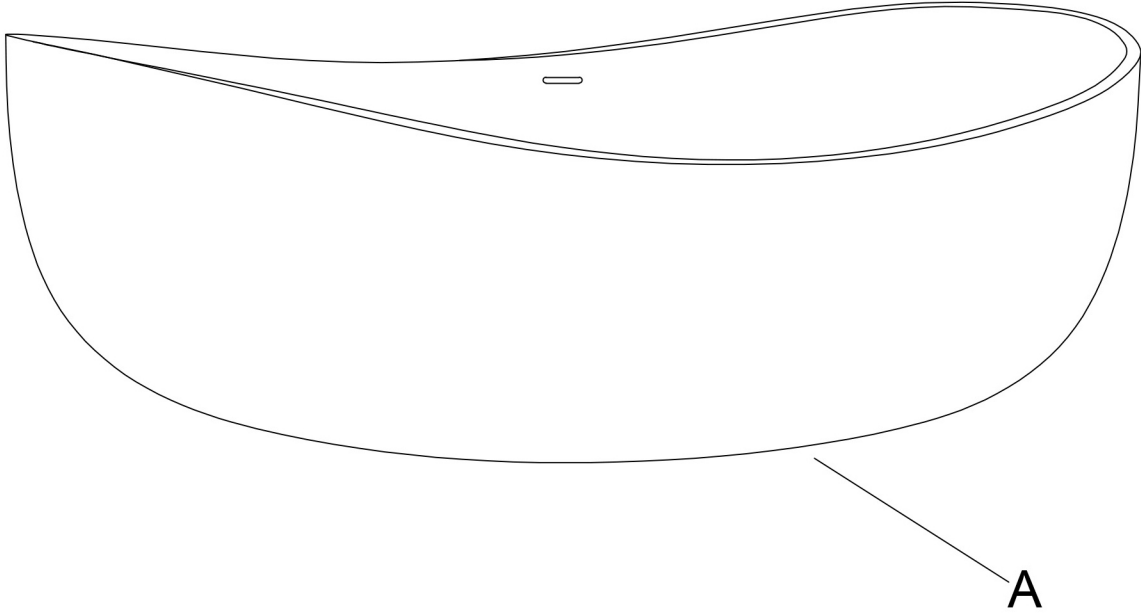

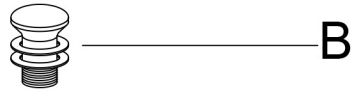

Before the Installation

1. Do not throw away packing materials until assembly is complete for small parts may come loose inside the carton during shipment. If parts are missing, please contact us.
2. Assemble this item on a soft surface, such as carpet to protect the finish.
3. Proper assembly of this item requires 2 people.
4. Periodically check to ensure that all connections are tight.
5. It is recommended that installation of the product be done by a qualified licensed plumber.

Care and Cleaning

1. To protect the finish, avoid use chemicals and household cleaners.
2. All hot serving dishes should be placed on a pad.
3. Any liquid spilled onto the top should be cleaned up immediately with a damp cloth.

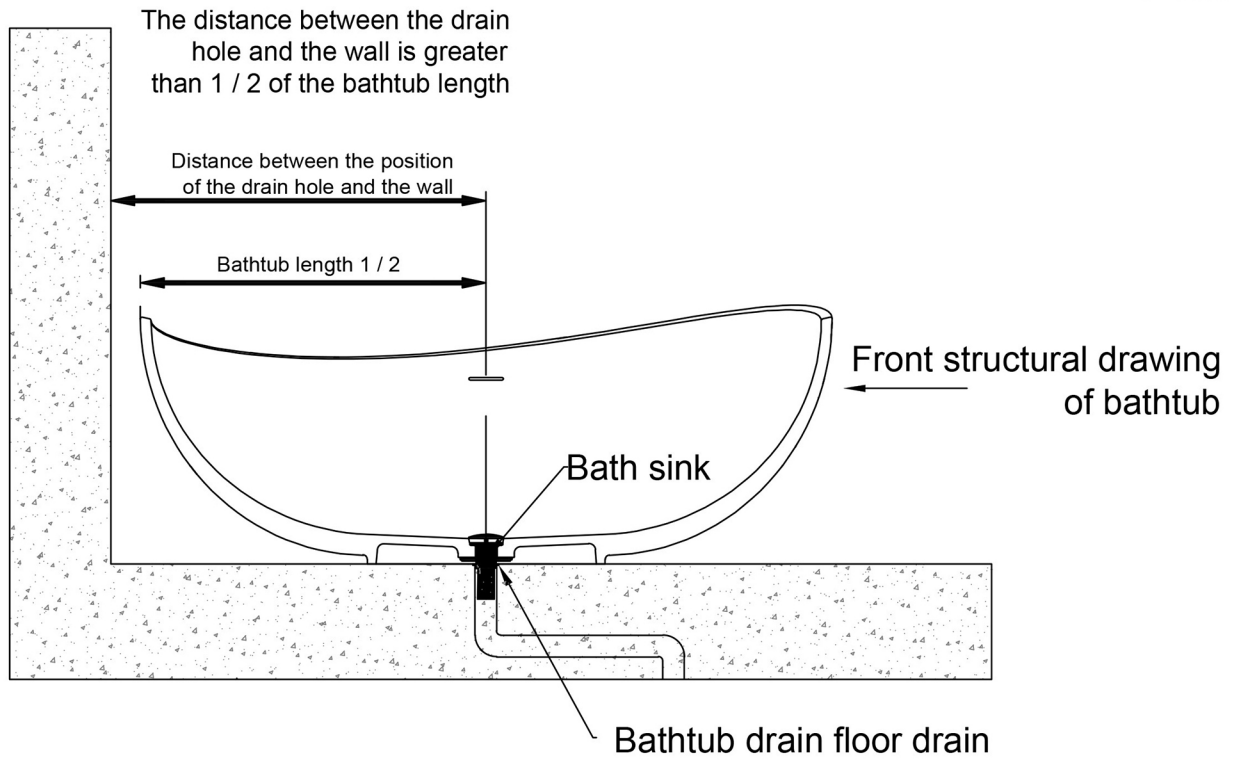

Parts List

Bath sink

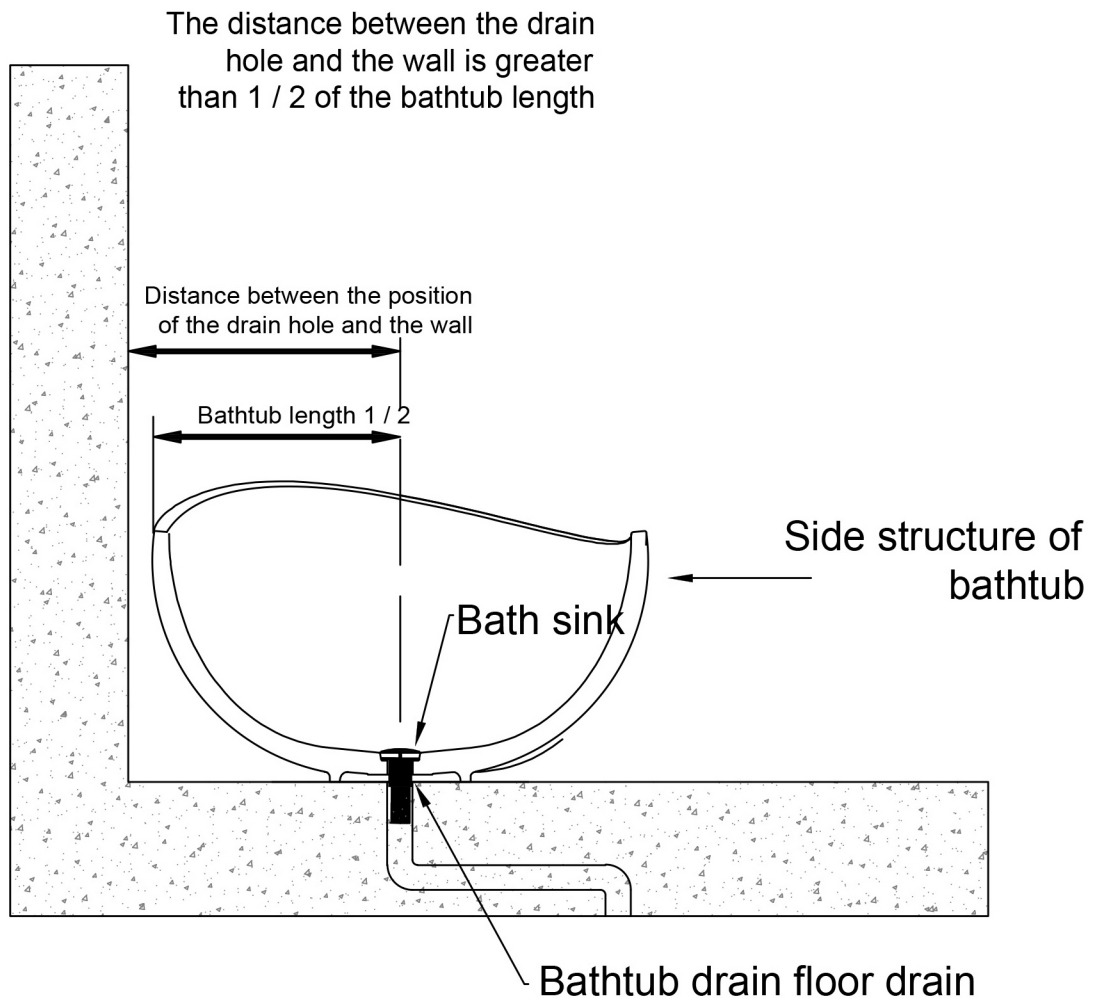

Bx1

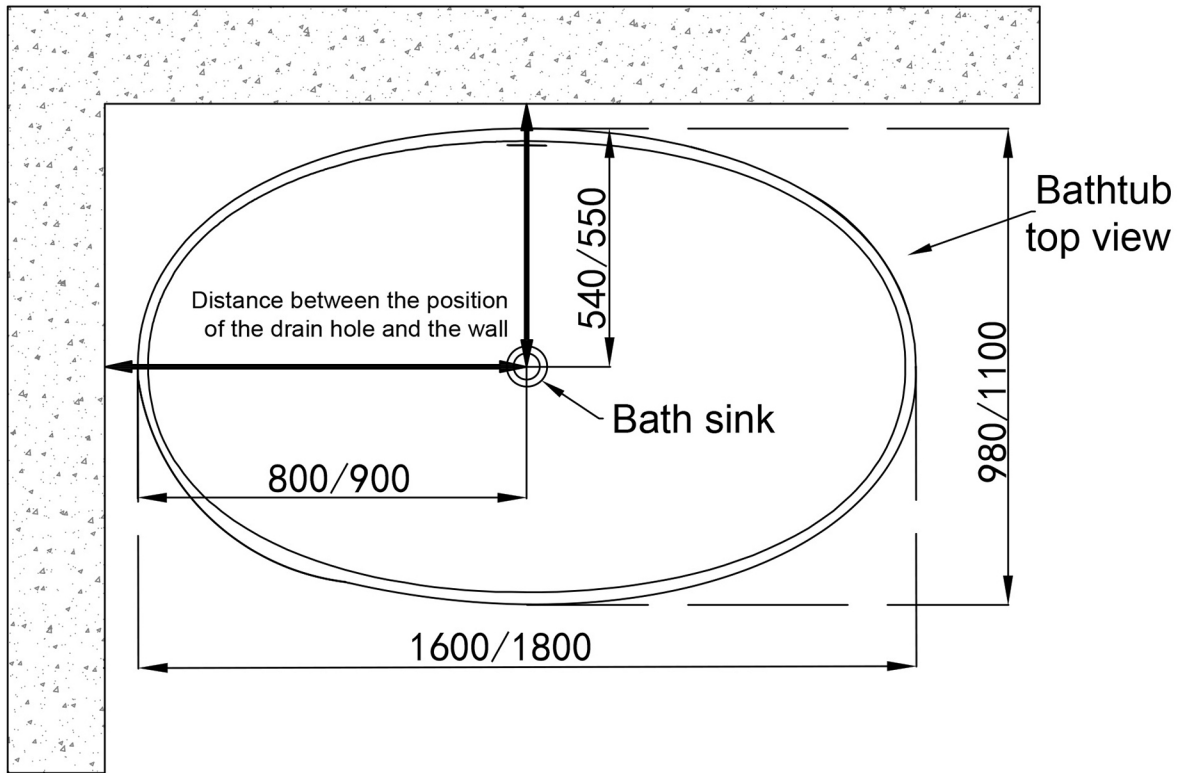

Step 1

The drainage structure of the bathtub is different from that of the conventional bathtub, so it is necessary to reserve the drainage hole position during installation, and the hole position should be aligned with the lower inlet of the bathtub. The reserved drainage hole position must be greater than half of the length and width of the bathtub

Step 2

(PS: because the artificial stone bathtub is made by hand, there is a tolerance. It is recommended to reserve an extra 10cm in length and width when reserving the drain hole.)
